

ThemeForest has new themes launch every weekday and every theme has pros and cons, so you can compare themes and see what works best for you and your website. We encourage you to visit ThemeForest throughout the week to see what's new. Perfect Winter Landscape All images used in the Perfect Winter Landscape's theme can be easily found, edited and used, wherever and whatever the license. Also, due to the fact that the theme was created on a single image, it's ideal for your posts and pages, ads, slideshows and so on. The layout of this theme is quite simple and has a clever layout. It contains a very subtle scrolling effect, which is paired well with the main theme and image, causing a pleasant sight and relaxing effect. The main menu of this theme includes a "Buy Now" button which leads to a one-page shop with eight different images to choose from, each available under a different license: high resolution, high quality, magazine, stock photo, super stock, royalty-free, royalty free and commercial license. During our theme tests we came across a few issues, but most of them can be easily solved. Issue 1: On some pages, an overlay block is showing up on top of some of the posts content and that's not easy to fix, as it shows all the posts on a page, so you have to move the cursor and delete every instance of the overlay block manually. Issue 2: When you post a video on the home page, the video won't play on our wordpress site, so that's another issue that can't be ignored. Perfect Winter Landscape Pros Pros: The one click install You can easily grab images from this theme's theme directory You can easily grab free images from this theme's theme directory The theme has 8 different license that gives you plenty of options Cons: On some pages, an overlay block is showing up on top of some of the posts content and that's not easy to fix When you post a video on the home page, the video won't play on our wordpress site If you use more than one image within the image tag of the theme's code, the images will be stacked vertically. If you use more than one image within the image

It adds an icy effect to the landscape. Scenic Description: Features: Clicking on an object (ex: a picture or file) in Scenic will send the file to the fp:// Clicking on an empty space in Scenic will zoom in. Clicking on a word will zoom in. Working a lot with multiple monitors, I need a new theme for my Canon laptop. I've tried a few themes but everything i chose has the same problem: it auto-zoom in when i click on a certain window or object (screenshot attached). This theme is intended for Vista, 7 and 8 Theming This is a WPF Theming, there are only a few xaml styles. Is this the right place to submit a request for a new theme? If not, could someone point me in the right direction please? Well, as I had said in my post, Scenic (and Snow) are just the two themes I tried, and they have this same issue. In particular, I tried many new themes, and in all of them, whenever you zoom in on a window (or object) with the theme, it would zoom in a lot, most of the time completely covering up the rest of the desktop. Looking forward to hearing other people's experience with these and other themes, and any feedback you may have, on themes for Windows 7 - as I just can't find one that does not automatically zoom in, and do not want that to happen to me, as it is completely annoying, and very distracting. Thanks ColinRichmond 06-27-2010, 07:54 AM Well, I can help you with that... Scenic and Snow is by the same person... I'm thinking of creating one because I don't like an auto zoom in, zooming is the only thing that autozoom in a window is, and it can
