THIS NEW VERSION HAS A LOT OF NEW FEATURES IN THE PREVIOUS VERSIONS NOW IT'S FULL WITH A UNIQUE PRESETS/SOUND, WITH THE BEST ARTWORK WITH 3 NEW HOT NICE BONES BY THE ORIGINAL DEVELOPER BEHIND THIS KONTAKT. It's is a FREE Good application that anyone can use and trust. The first batch of the new Kontakt v5.0.1 update (codename: Night Shift) is available for download. You can find it here: Following hot on the heels of a new version of the Kontakt instrument (Kontakt 5.0.0), the company released a new version today in the form of Kontakt 5.0.1. This update has removed two features from the previous Kontakt 5.0 update (Night Shift), namely Patcher and the Performance Manager, in favor of new features aimed at addressing the needs of Kontakt users: Unlocked Version Kontakt has had the ability to import plug-ins and sample banks from within the editor for some time. This new version removes that restriction, providing a much more direct option for importing sample banks from other DAWs. It also provides a much more robust, searchable table of all the exportable information a user might want to put into a sample bank, which isn't limited to the usual sample rate, sample format, and instrument tracks. Kontakt 5.0.1 also provides a number of improvements to the Interface. New themes. More detailed drawer contents. Faster search. Improved keyboard shortcuts. Improved sample browser. Unified undo. Accurate sync between projects. A number of interface stability improvements. The difference between the new Kontakt 5.0.1 update and the previous version is very small (it's made up of a couple dozen files, most of which are new), so the download should only take about a minute. The new update is free to existing Kontakt users; those wishing to upgrade to the latest version should purchase the regular price of Kontakt 5 from the company's website.
