Transition from versions prior to 2007 Autodesk's drawing manager was developed from CADAM, the acronym used by Autodesk to market AutoCAD until it was split into the two products AutoCAD R13 and AutoCAD LT. AutoCAD LT is a watered down version that can be used for general 2D drafting. Before 2007, AutoCAD required installation of a graphic card to render the toolbars, palettes, layer manager, plot area, and command line. After the 2007 release, the new interface uses a new component that is integrated into the operating system. As of version 2008, a number of hardware and software components needed for the desktop product of AutoCAD are integrated into the software bundle (AutoCAD LT and AutoCAD for Windows). News Venezuela: President Maduro blames opposition for food shortage 10 December 2016 Share The Venezuelan president, Nicolás Maduro, has claimed that anti-government protests have led to a food shortage in the country. He said in a televised address that this week's demonstrations - which began on 7 December and have since taken place across the country - are "the Venezuelan people's war". Last week, Maduro said that he had cut government spending to save Venezuela money because the country faced a critical shortage of food and medicine. He claimed that his administration had been trying to get reserves to make up for the shortfall, but had been blocked by "violent sectors" in the opposition. Last week, Maduro said that the government had ordered the country's biggest supermarket chain, Zayti, to release all food in its warehouses in order to prevent the food shortages that have already started. On 6 December, Zayti said it had sold its entire stock of groceries and made a profit of 3.5 million bolivares (USD 8.9 million) from the sales. Zayti's senior vice president, Jhonny Calzadilla, told the Telesur news agency on 10 December that the stores were now full and their shelves had been replenished. He said that about a million sacks of rice and 3.5 million US dollars worth of chicken, egg and milk had been distributed to poor families throughout the country. A Reuters report in 2011 estimated that Venezuela had more than 200,000 tonnes of food stocks in the national warehouse system. Maduro's televised address, posted on the Venezuelan presidency's Twitter account, made no mention of the Zayti supermarket chain. Instead, he claimed that "Venezuela's food production is limited to 100,000 tonnes a month, which means that we can barely fill
